

Next to Go

Down By Law

living -- if you can call this living
thinking will it ever go away?
dying -- there's all these people dying
i'm conscious of it every single day

[chorus]

who's gonna be the next to go?
walking in a new kind of fear
laughing at all the people here
asking how could this happen here?
taking my choices away

[chorus]

under the gun
well it's been a month, standing in the shadows
under the gun
well it's been a month, hiding from the sun
parking lots all up and down the interstate
and on the news it's a great debate
back to the normal? it will have to wait
