

I've Got You

Drew Holcomb & the Neighbors

"I've Got You"

I saw stars like a blanket

I saw people just like me

There was a light moving forward

I've got the world and I've got you

There was a song they were singing

There was a window to the moon

I saw laughter like a promise

I've got the world and I've got you

I've got the world and I've got you

I've got a dream over my shoulder

I've got love tied around my waist

I've got a big imagination

I've got the world and I've got you

I've got the world and I've got you

I've got a dream over my shoulder

I've got love tied around my waist

I've got a big imagination

I've got the world and I've got you

I've got the world and I've got you
