

Centipede

Joshua Homme, Chris Goss, Dave Grohl and Alain Joh

Giant tropical centipedes share their territories with tarantulas.

Despite it's impressive length, it's a nimbo navigator, and some can be highly venomous.

As quick as lightning, just like the tarantula it's killing, the centipede has two curved hollow fangs which inject
paralyzing venom.

Even tarantulas aren't immune from an ambush.

This centipede is a predator?

Centipede!

Centipede!

Centipede!

Centipede!

Mouhahahaha!

Centipede!

Centipede!
