

Radio Waves

Bap Kennedy

Across space and time they travel at the speed of light
Near some distant star they're listening to me tonight
On those radio waves, those radio waves carry me
Those radio waves, those radio waves carry me.
I've fallen in love but I think I'm over the worst
Music can save you but it might try to kill you first
And those radio waves, those radio waves carry me
Those radio waves, those radio waves carry me.
Moments like these are few and far between
I'm in my element baby, can you hear me
On those radio waves, those radio waves carry me
Those radio waves, those radio waves carry me.
Those radio waves, those radio waves carry me.
Those radio waves, those radio waves carry me.
