

# We're All in Love

## Black Rebel Motorcycle Club

I'll keep it in my head till I know I  
Until I know that I can leave your doorstep  
Until I know the conversations cold  
I'll hide it in the words until I know I  
Until I know that I can be alone here  
Until I know the consequences known We're all in love with something that we can't see  
We're all in love with something that we can't see  
I'm in love with something that we can't see  
I'm in love with someone that we can't see I'll throw you out and bring you back later  
Everything I see's a complication  
Everyone I known has come and go  
I've fallen in the reason for the passion  
Everyone needs something for their hands when  
When they know they're gonna be alone We're all in love with something that we can't see  
We're all in love with something that we can't see  
I'm in love with something that we can't see  
I'm in love with someone that we can't see I'm looking for something to shout  
Something I know I cannot doubt  
I'm looking for something to shout  
Something I know I cannot doubt  
Come on won't help me out We're all in love with something that we can't see  
We're all in love with something that we can't see  
I'm in love with something that we can't see  
I'm in love with someone that we can't see I'm in love without you  
I'm in love without you  
I'm in love without you  
I'm in love without you We're all in love with something that we can't see  
We're all in love with something that we can't see  
I'm in love with something that we can't see  
I'm in love with someone that we can't see
