

Gypsy Woman

[Hilary Duff](#)

Was it her face that invaded your mind?
Her kind isn't that hard to find
She lets you think that you found her first
That's how she works, her sick and twisted gypsy curse
She can swallow knives, she can swallow lives
Gold and black stare brought the night of your demise
Tried to runaway with a gypsy woman
Here today then gone for good
Can't get away with a gypsy woman
Thought no one would know your secrets down below
But you can't go, can't go with her
Can't go, can't go with her
Can't go, can't go with her
Can't go, the gypsy woman
This is her favorite game to play
She's got you stumbling, stumble, st-st-stumbling
Talks with a grin 'cause she's got no shame
Enjoy the fame, bringing down the family name
She can swallow knives, she can swallow lives
Gold and black stare brought the night of your demise
Tried to runaway with a gypsy woman
Here today then gone for good
Can't get away with a gypsy woman
Thought no one would know your secrets down below
But you can't go, can't go with her
Can't go, can't go with her
Can't go, can't go with her
Can't go, the gypsy woman
She can rob you blind with just one look
From those eyes
Out of all the thieves that trained her
None of them could tame her
Tried to runaway with a gypsy woman
Here today then gone for good
Can't get away with a gypsy woman
Thought no one would know your secrets down below
But you can't go, can't go with her
Can't go, can't go with her
Can't go, can't go with her
Can't go, the gypsy woman
But you can't go, can't go with her
Can't go, can't go with her
Can't go, can't go with her
Can't go, the gypsy woman
Tell me, was it worth it?
Can you say it's worth it?
Tell me, was it worth?
Can you tell me it was worth it?
