

# I'll Go Until My Heart Stops

## 36 Crazyfists

Between the seasons we find room And I like the way your lips turned legendary  
And I like the way the sun will come to light  
And I like the way your lips turned legendary  
And I like the way the sun will come to light But it won't be long until it's your very last, goodbye  
Decide to make it hard, to find but make it And if you decide that you  
Need a thousand heartaches, a thousand heartaches  
And into this hotel room  
Was the greatest mistake, the greatest mistake And I want this all to be just necessary  
So when the darkness comes, we won't need the light  
And I want this all to be just necessary  
So when the darkness comes, we won't need the light It won't be long until it's your very last goodbye  
Decide to make it, between the seasons we find room And if you decide that you  
Need a thousand heartaches, a thousand heartaches  
And into this hotel room  
Was the greatest mistake, the greatest mistake This is as real as it gets with weapons in hand  
We opt to not lay down our guns And if you decide that you  
Need a thousand heartaches, a thousand heartaches  
And into this hotel room  
Was the greatest mistake, the greatest mistake Between the seasons we find room to breathe out  
Between the seasons we find room to breathe out And if you decide that you  
And if you decide that you  
And if you decide that you  
And if you decide
