Suffice To Say

Terrior Bute

There's a way she touches me, gently like a summer's breeze
It's like poetry in motion when she speaks
By the warmness of her hands, I can heal them once again
I feel strong enough and free enough to love
There's something in her way that tells me she's the one
This love won't change throughout the seasons
She's more than words can say
A lullaby in harmony is all that's really needed to convey
Suffice to say, she's my everything
When the snowflakes fall at night, it reminds me of her eyes
I can sit amazed for hours at a time
I've been meaning to say, precious words to make you stay
So I've devoted time to open to you my heart
There's something in her way that tells me she's the one

This love won't change throughout the seasons
She's more than words can say
A lullaby in harmony is all that's really needed to convey
Suffice to say, she's my everything
She's the reason, my guiding light
There's no expression [unverified]
She's the summer time and winter through spring
She's my everything, my everything
There's something in her way that tells me she's the one
This love won't change throughout the seasons
She's more than words can say
A lullaby in harmony is all that's really needed to convey
Suffice to say, she's my everything
