

Cut Me and I'll Bleed

Blossoms

CUT ME AND I'LL BLEED
Rebel flow, I watched her go
Oh cut me and you'll see
That I'm not lost
The winter frost, from the night
Comforts me CUT ME AND I'LL BLEED
Jealously, she envies me
Cut me and you'll see
That I cut in the dark
This tricky love in the night
She comforts me
So come and show me what she wants
Would you tell me if you want my love?
Come and show me what you need
But CUT ME AND I'LL BLEED Show me what this could be
You must be glad to tell me this
Form me another lead
'Cause I can't tell,
But under the spell of your eyes
They comfort me So come and show me what she wants
Would you tell me if you want my love?
Come and show me what you need
But CUT ME AND I'LL BLEED And I'll replay this in my mind
To remind me I'm not lonely
But I don't know where you are
I'm not sure if I'm your only
So come and show me what she wants
Would you tell me if you want my love?
Come and show me what you need
But CUT ME AND I'LL BLEED
