

Cold Hard Love

Tory Lanez

[Verse 1]

So you took a chance with me cause you heard I'm cool
Well let me show you that what you heard was true
And you're supposed to feel like it's hard for you
And this is what we're 'bout to do
I dance around my house to your favorite song
Yes, I let you front when you got my t-shirt on
And I wanna touch but I just stay cool
And this is what we're 'bout to do[Chorus]
Cause it took a lot to keep it unpredictable
As long as you let me love your heart and touch your soul
And when you give it up to me, you give your all
Cause all that I give in return is..
Cold, hard, hard love
Cold, hard, hard, love

[Verse 2]

Put your records on, have sex all up in the air
Waking up, my fingers all up in your hair
Those stares you do make my world blue
Those that go through us
Now take hold of me baby, I feel it too
Never been this far from safe but I will hold you
Cause there's nothing left to hold to[Chorus]
Cause it took a lot to keep it unpredictable
As long as you let me love your heart and touch your soul
And when you give it up to me, you give your all
Cause all that I give in return is..
Cold, hard, hard love
Cold, hard, hard, love[Bridge]
Uh, what if I told you I ain't know love
And all those chicks are ones I don't love
Shit's still gettin' harder for me
When I'm tryin' to find it alone
But I know it's supposed to be grown love
It might be time, a nigga owed up for the shit I once did
Games that I once played, shit =I once said
Know it's turning back on me
Don't turn your back on me now
I need you more than ever

You make me wanna put this TV off of sound
And put these covers over us and take it slow forever
We go together, we're so forever
You put the sunny in my stormy weather
I spent forever just tryna figure how
I could fit up in your endeavors
You know I love you like a bro whenever
You be shootin' who we aimin' at
But who layin' your body down and where the statement at?
My love is lost, who gon' show you where to claim it at?
You always told me you could show me how to claim it back
Uh
