

# Star of Fate

## The 69 Eyes

As I seal your lips  
With a good-night's kiss, my love  
I feel that I'd miss  
That longing deep inside my heart  
But I have to go  
Before the morning grows too old now  
The second star from the right  
Is the one I use as my guiding light  
Tonight I cast my spell  
And I wish upon a star  
Star of fate keeps me moving along  
Follow that dream of my heart  
As I seal your lips  
With a good-bye kiss, my love  
It's been hit and miss  
Hurting deep inside my heart  
But I have to go  
Before we grow too old now  
That second star from the right  
Is the one always shining there by my side  
Every night I cast my spell  
And I wish upon a star  
Star of fate keeps me moving along  
Follow that dream of my heart
