

Dancing To The Same Song

Elen Levon

Take me back to the place
Sittin there with that look on your face
In denial that you just wrote
A love song on a pink note Its the little things that make me
Drive until the car breaks down
To make you come and save me
So we can be together right now Can you reach me from across the globe?
Can you pick me up and take me home?
Cause Ill never feel like Im alone
When were dancing to the same song
And when were standing in the dark
I know somewhere we got that spark
I never feel like Im alone
When were dancing to the same song
Woah Oh, Woah Oh
Da da da dancing to the same song
Woah Oh, Woah Oh
Da da da dancing to the same song Satellite spinning round
Bouncing back the melody you sing now
A million miles around the world
The signal hits my heart, its about to burst And even when the lights burn out
And the sun is drowning in the sea
We got the fire in my heart
And its about to break free Can you reach me from across the globe?
Can you pick me up and take me home?
Cause I never feel like Im alone
When were dancing to the same song
And when were standing in the dark
I know somewhere we got that spark
Ill never feel like Im alone
When were dancing to the same song
Woah Oh, Woah Oh
Da da da dancing to the same song
Woah Oh, Woah Oh
Da da da dancing to the same song You got me, I want you
So lets do anything we wanna do
Turn it loud, you feel it now
We can light it up, were gonna burn it down Can you reach me from across the globe?
Can you pick me up and take me home?

Cause Ill never feel like Im alone
When were dancing to the same song
And when were standing in the dark
I know somewhere we got that spark
I never feel like Im alone
When were dancing to the same song
Woah Oh, Woah Oh
Da da da dancing to the same song
Woah Oh, Woah Oh
Da da da dancing to the same song
Da da da da da da da
Dancing to the same song, da da dancing to the same song
Da da da da da da da
Dancing to the same song, da da dancing to the same song
