

Wild Life

Paul McCartney

Applies to the words 'You' and 'Me'

While takin' a walk through an African park one day

I saw a sign say, 'The animals have the right of way' Wild life, whatever happened to
Wild life, the animals in the zoo? We're breathing's so hot, another political nonsense in the air

You're making it hard for the people who live in there

You're moving so fast, but, baby know not where Wild life, what's gonna happen to

Wild life, the animals in the zoo? You'd better stop, there's animals everywhere

And man is the top, an animal too

And, man, you just got to care Wild life, what's gonna happen to

Wild life, the animals in the zoo? You're breathing a lot of political nonsense in the air
You're making it hard for the people who live in there Wild life, what's gonna happen to?

(Wild life, what ever happened to, whatever happened to)

Wild life, the animals in the zoo?

(Wild life, what ever happened to, whatever happened to) Wild life, what ever happened to, whatever happened
to

Wild life, what ever happened to, whatever happened to

Wild life, what ever happened to, whatever happened to

Wild life, what ever happened to, whatever happened to

(The animals in the zoo) Wild life, what ever happened to, whatever happened to

Wild life, what ever happened to, whatever happened to

Wild life, what ever happened to, whatever happened to

Wild life, what ever happened to, whatever happened to Wild life, what ever happened to, whatever happened to

Wild life, what ever happened to, whatever happened to
