

# Our Town

[James Taylor](#)

Long ago, but not so very long ago  
The world was different, oh yes it was  
You settled down and you built a town and made it live  
And you watched it grow  
It was your town Time goes by, time brings changes, you change, too  
Nothing comes that you can't handle, so on you go  
Never see it coming, the world caves in on you  
On your town  
Nothing you can do Main street isn't main street anymore  
No one seems to need us like they did before  
It's hard to find a reason left to stay  
But it's our town  
Love it anyway  
Come what may, it's our town
