Afraid To Lose

[Dave Hollister](#)

I don't control the future
So I'm living like I know that the world is about to end
'Cause I got the chance to be with you,
Turns out it is was the best that I ever did
And will walk with dead light just to be where you are
And the time will take the breath in and out
Just too long to be apartYou never see me run away from anything
When times get rough nobody last as long as me
There's not too many things in life I'm scared to do
But this one thing has me terrified
Girl I'm afraid, I'm afraid to lose you
Yes I am, I'm afraid to lose youNobody lives forever
Sometimes I'm question God why am I here?
Then I see us together and somehow that makes it better
Everything is cloud it suddenly becomes clear
I walk throw fire jut to be where you are
And the time will takes me to breath in and out
Is too long to be apartYou never see me run away from anything
When times get rough nobody last as long as me
There's not too many things in life I'm scared to do
But this one thing has me terrified
Take my eyes and I still feel you
Under water I just breath you
And my heart only beats in hand tamed
Wherever you are not around
Take you away from me
You might as well burn my way to the ground
