Wave Motion Gun

Sicko

You had a year
now there's 12 days left to save the Earth
let's get out of here
and we're stuck out in space in a battleship
Derek Wildstar where are you
we've got some work for you to do
there's no time to fuck around
save it 'till you're back here on the groundAnd you better buckle down
the Comet Empire's closing in
and you better hurry back
before they attack again
you're our only hope
since the damage has begun
you and that goddamn wave motion gunThe Gamilons raging full on
have turned the Earth into a mess
your brother's dead your family's gone
who are you trying to impress
