

# Wave Motion Gun

## Sicko

You had a year  
now there's 12 days left to save the Earth  
let's get out of here  
and we're stuck out in space in a battleship  
Derek Wildstar where are you  
we've got some work for you to do  
there's no time to fuck around  
save it 'till you're back here on the ground  
And you better buckle down  
the Comet Empire's closing in  
and you better hurry back  
before they attack again  
you're our only hope  
since the damage has begun  
you and that goddamn wave motion gun  
The Gamilons raging full on  
have turned the Earth into a mess  
your brother's dead your family's gone  
who are you trying to impress
