

California Queen

Wolfmother

Slipped off into the slip stream
She's looking for the summer dream
Came down from the mountain
To find another machineRunning down all the byways
Listen to all that she says
Couldn't see very far
Find out all that you are, my California queenFully air-reconditioned
Self-made man machine
With a homemade hydroponic
Way to find out what it means, my California queenStanding in front of the rainbow
Could you tell me where do all the people go?
Rising from the mystic haze
Standing in front of all creationWith all their mystic ways they seem to control the days
Somebody got to get behind it
To find out all that it means, my California queen
Oh, tell me what it means, my California queenStanding in front of the rainbow
Could you tell me where do all the people go?
Rising from the mystic haze
Standing in front of all creation
