

Hey Love (Revised)

Nikka Costa

You've said all you have to say
You've hit the wall and can't get through another way
You got your eyes down to the floor
You say you don't think you can give anymore We're colder than you've ever known
It seems we made our choice and now you walk alone
But just in case your mind's not made
Tell me if there's still a chance I could persuade You say you've tried but can't go on trying in vain
While we step over your tears
But I say try and try again
Because we need to hear Hey love, while we try so hard
To get our way you're pushed aside
We're running faster
But it's only you we leave behind Hey love, and everyday you try
To rise above we let you down
If you let us we'd really
Wish you were around You say you've tried but can't go on trying in vain
While we step over your tears
But I say try and try again
Because we need to hear, hey love I know you won't disappear
It's plain to see in every child that you put here
But if you should turn away
I don't think we could afford the price we'd pay While we try so hard
To get our way you're pushed aside
We're running faster
But it's only you we leave behind Hey love, and everyday you try
To rise above we let you down
If you let us we'd really
Wish you were around But I say try and try again
Because we need to hear
Hey love Hey love, never go, never go
Hey love, never go, never go
Hey love, never go, never go
Hey love, never go, never go
Hey love, never go, never go
Hey love, never go, never go
