Keep On Breathing

Lena Katina

I tried to understand to comprehend
How certain things can happen
I thought that if you strive for good like everybody should
The angels will watch over you
Watch over you
When the future has changed and your world is a mess
And you find yourself down in the dirt
When the sky is on fire and the heavens descend
All you can do is just keep on breathing
(You keep on breathing)
I wish
That I could seal, that I could heal
The wounds left in our wake
I pray however much we bleed somehow there?s a new seed
Cause angels will watch over
You watch over you

When the future has changed and your world is a mess
And you find yourself down in the dirt
When the sky is on fire and the heavens descend
All you can do is just keep on breathing
You keep on breathing
When you?ve lost all reasons why you should go on
Try to find your way even if all hope is gone
I tried to understand, to comprehend
How this could happen?
When the future has changed and your world is a mess
And you find yourself down in the dirt
When the sky is on fire and the heavens descend
All?
You can do is just keep on breathing
You keep on breathing
Keep on breathing
You keep on breathing
