

# I Like The Way

## Phil Collins

I look out the window every day, I see the world go by

Watching I sit and wait for you

Just hoping you'll catch my eye

You see me stare but I don't care

I like the way you smile

One day I'll get to talk to you

Ooh, right now well I'm too shy

But in my world of make believe

You're the one what I need, oh, oh...

I could imagine me with you

But it's an impossibility

I'd love to try to realise, I gotta deal with reality

But if you turn my way, I'd look away, ooh even face-to-face

And deep inside me, inside my mind

Someone else is trying to take my place

But in my world of make believe

You're the one what I need, oh, oh...

Oh, come with me, I'll show you everything

Come with me, ooh

Come with me, I'll show you everything

It could be, come along with me and let me take you there, oh, oh...

I look out the window every day, I see the world go by

Watching I sit and wait for you

Ooh, just hoping that you'll walk by

But if you turn my way, I'd look away, ooh even face-to-face

And deep inside, ooh in my mind

Someone else is trying to take my place

In my world of make believe

You're the one what I need, oh, oh...

Come with me, ooh

Come with me, I'll show you everything

It could be, come along with me and let me take you there, oh, oh...

All of my life, come with me, come with me, come with me...

All of my life...

I like the way you smile

All of my life...
