

# Love Will Last Forever

**Renald Francoeur**

Turn around, I'm still the one that is holding your hand - just like I always been. I'm still the one that you count on - count on me for everything.

You and I, never knew how to surrender - oh no we did it all together. This is just the beginning, it only gets better!

I just wanna stay here forever, as long as the world is spinning around, round. I promise that I won't let you down, down. No we'll never hit the ground - our love will last forever!

Turn around, I'm still standing by your side, and I'll be there for a lifetime, there's no way I could ever change, I could never change my mind.

You and I, never knew how to surrender - oh no we did it all together. This is just the beginning it only gets better!

I just wanna stay here forever, as long as the world is spinning around, round. I promise that I won't let you down, down. No we'll never hit the ground - our love will last forever!

Everyone who said we'd be over - we turned them into believers (yeah)! Not even close to the ending, it's gonna keep getting better - yeah!

You and I, never knew how to surrender - oh no, we did it all together. This is just the beginning, it only gets better!

I just wanna stay here forever, as long as the world is spinning around, round. I promise that I won't let you down, down. No we'll never hit the ground - our love is gonna last forever! As long as the world is spinning around, round. I promise that I won't let you down, down. No we'll never hit the ground - our love will last forever!

Turn around, I'm still standing by your side, and I'll be there for a lifetime, I'll be right there! Our love will last forever!
