The Only One

Lucero

she never says hi to me no more
and that's a pretty good way for her to even the score
things went bad, I guess it don't mean much
she used to say I was the only one
she never says hi to me no more
she never even looks my way no more
and I can hear her talking through the bedroom door
she's not here for me, cause we're all done
I know damn well I was the only one
I know damn well I was the only one
she never even looks my way no more
she never even looks my way no more
She never even looks my way no more
and I can hear her talking through the bedroom door
