

People In the Valley

America

Some came down to hang out by the river
Others were waiting to find the night
We stood long just waiting for the picture
Looking at people to see what was right
Soon came the people from over in the valley
Hundreds of them walking towards us in the rain
And we turned around and hid out in the alley
Met along the stones down, Tomorrow Day Lane
Take away the road and no one will remember
How many journeys we hedged in the stone
Friends around will take away the wonder
Sharing a moment of being alone
Soon came the people from over in the valley
Hundreds of them walking towards us in the rain
And we turned around and hid out in the alley
Met along the stones down, Tomorrow Day Lane
