

You Make Us Sick

Outbreak

Dealing with you is more than I can take, 'cause you're just another fucking fake. Overtime you'll fade out and everyone will know what you're about. You've been on my back all fucking day, before I explode get the fuck away, 'cause I can't take anymore and I've told you times before that I've got some news for you, you fucking dick, fuck you, you make us
