Tiny Little Robots

Cage the Elephant

When you get fired up
When you get fired upI've got you movin' to the city
Oh my, you think you're lookin' pretty
But they've got a pistol too
Tucked down beneath their shoeIt's a new sensation, world annihilation
Movin' to the music, patiently it's waitin'
The city's screamin', I can hear them breathin'
Cryin' out for wisdom, hungry minds are feedin'And I know that you're tired of this
'Cause you're a robot they designed your life
True souls said you know what's right
And you can join us on the other sideAre you scared?
Are you scared?
Are you scared?I've got you marchin' to a drum beat
Oh my, you got another nose bleed
They'll keep you so amused
You'll never taste the truthIt's a new creation, total domination
Chains across your shoulders, social captivation
Kill our leaders, persecute our teachers
Criticize our culture, crucify free thinkersI know that you're tired of this
'Cause you're a robot they designed your life
But true souls said you know what's right
And you can join us on the other sideAre you scared?
Are you scared?
Are you scared?Fill our eyes with money, vanity that's cunnin'
Only on the surface diamonds look so stunnin'
Mass deception altered our perception
Sold it to the children, made a new connectionAnd I know that you're tired of this
'Cause you're a robot they designed your life
But true souls said you know what's right
And you can join us on the other side
