

# Looking Glass

[K-Otix](#)

Spilled our hearts our souls until it forced us to swim  
But all the water pass was sinking fast  
Gave our all until the saw was digging in  
I watch it bleed, I let it be Made me have to throw the looking glass, you, you  
Made it cold and made my summer pass, you, you The moon, the dust, the dreams, the rust are shattered now  
I let them pass, I let them dance  
Stolen time, the crooked line is pointing up  
Were stars away blazing Made me have to throw the looking glass, you, you  
Made it cold and made my summer pass, you, you Made me have to throw the looking glass, you, you  
Even made it cold and made my summer pass, you, you
