

Bellow

Cover Your Tracks

There's a voice in my head and he's already dead
There's a voice in my head. I feel it in my skin
Soon as I'm looking out I know it's staring in
Though I see nothing there I feel it breaking in
I can feel it in my skin
Set your demons free Let them dance and sing
Let them bellow straight from the bottom
Set your demons free
Let them pour their drinks
Let them drown inside the bottle
Are you ready to lie?
Are you ready to bleed?
Are you ready to sacrifice for me? I'm gonna make you steal, gonna make you cheat
Gonna drive you to hell and back with me
There's no deal with the devil, only fire
There's no deal with the devil, only fire
Set your demons free
Let them dance and sing
Let them bellow straight from the bottom Set your demons free
Let them pour their drinks
Let them drown inside the bottle
None of this even counts
Cause we're finally free now
Set your demons free
Let them dance and sing
Let them bellow straight from the bottom Fire!
Light it up!
Strike a match with me, play with fire!
Light it up!
Strike a match with me!
There's no deal with the devil, only fire
Set your demons free
Let them dance and sing
Let them bellow straight from the bottom Set your demons free
Let them pour their drinks
Let them drown inside the bottle
None of this even counts
Cause we're finally free now
Set your demons free

Let them dance and sing
Let them bellow straight from the bottom
Inside the bottle
