

# Run Around

[Diz Gibran](#)

One time, run around, don't look turn for me to go your way  
You left me here with out anything to love, I'll tell you  
I've had enough of your hands running round my brain  
And I've had have enough of the way that you cause me pain  
So slow down, run around your other side, walk with me instead tonight  
We could be near like we use to be before  
Ah girl, I need more of the times that you've turned me round  
And there's no time to turn away love I've found  
So couldn't we forget about today, start again from where we were  
We use to dance out to space without a care  
And our laughter come ringing and singing we rolled 'round the music  
Blinded by colors come crashing from flowers  
That sway as you stay here by me  
Slow down, run around your other side, walk with me instead tonight  
We could be near like we use to be before  
Ah girl, I need more of the times that you've turned me round  
And there's no time to turn away love I've found, run around  
One time run around, don't look back turn for me to go your way  
You left me here with out anything to love, I'll tell you  
I've had enough of your hands running round my brain  
And I've had have enough of the way that you cause me pain, run around
