Us (Instrumental)

Samael

some say it's hard to get it all
but what I dreamed is what I am
I turned my eyes to see it all
to give you what you're looking forcome the force come the wind come the sun
into our ringmake me shine make me rain make clear water with blood
take me high burn me up and tear it all down
push me out throw in the ocean of love
make me win what i lost
make me one make me I
should I keep you in my wheel should I take you in my armsif you want what I want
if you need what I amcome on let's be as oneif you want what I want
if you need what I am
come on take me homestep on it stay above I did spoil your life with light
to let you see what can be if our hearts ever collidewon't you give me a try won't you give me another chance
won't you give me a try won't you give us another chanceyou're here when I'm there
I see you everywhere
you're cool you're special
you're calm and beautiful
you're a nine you're mine
and we got along at nightif you want what I want
if you need what I am
come on let's be as oneif you want what I want
if you need what I am
come on take me homewon't you give me a try won't you give me another chance
won't you give me a try won't you give us another chance
