Stay the Same

Bent

Oh, there's something about you, baby
Something that's hard to explain
Don't want you to change it, rearrange it
I just want you to always stay the sameThough the things in my life keep on changing
And the things people say can really hurt
Don't you to change it, re, rearrange it
I just want you to always stay the sameI just want you to always stay the sameI just want you to always stay the sameI just want you to always stay the sameI just want you to always stay the same
