

# Black Box

Sivert HÃ¸yem

Featuring Bruno Mars  
(Verse)

Sending out a mayday  
We're going down  
Nothing we could have done  
Would have turned it round  
Everything we had scattered everywhere  
Searching through the wreckage of a love affair

(Bridge)

You got something to say?  
Say it to me

Not everyone else  
You say that I'm to blame  
My words are in vain  
Don't go fooling yourself

(Chorus)

There's a little black box yea  
Somewhere in the ocean  
Holding all the truth about us  
There's a little black box  
A record of emotion  
Everything that ever was  
You may deny it  
But when I find it  
I'm gonna play it aloud to the world  
Little black box yea  
In a little black box yea

(Verse)

There's a lot of pressure when you get deep  
You left me on my own at six hundred feet  
I was looking round for a little help  
But everyone was looking out for themselves

(Bridge)

You got something to say?  
Say it to me  
Not everyone else

You say that I'm to blame  
My words are in vain

Don't go fooling yourself  
(Chorus)  
There's a little black box yea  
Somewhere in the ocean  
Holding all the truth about us  
There's a little black box  
A record of emotion  
Everything that ever was  
You may deny it  
But when I find it  
I'm gonna play it aloud to the world  
Little black box yea  
In a little black box yea

(Verse)

You can't stop a true survivor  
You'll discover that on your own  
Cause I'm a true survivor  
And I'll be here after you've gone  
Long after you've gone  
Long after you've gone

(Chorus)

There's a little black box yea  
Somewhere in the ocean  
Holding all the truth about us  
There's a little black box  
A record of emotion  
Everything that ever was  
You may deny it  
But when I find it  
I'm gonna play it aloud to the world  
Little black box yea  
In a little black box yea  
Little black box  
Little black box  
Little black box
