

# Let's Talk About Tomorrow

[Olivia Newton-john](#)

Life, a gift we cannot take for granted  
We gotta live it right, we are the parents of our planet(We've touched the moon)  
And built the final gun  
(If war was food)  
We could feed everyoneTalk about the children, what will be their legacy?  
If they have a future, it is up to you and me  
Talk about forever, for we may not have that long  
Oh, it's now or never, let's talk about, let's talk about tomorrowTrees, animals and seas, we're all connected  
They have a right to be but they can't ask to be protected(I feel the rain)  
Burning from the sky  
(We are to blame)  
If we just close our eyesTalk about the children, what will be their legacy?  
If they have a future, it is up to you and me  
Talk about forever, for we may not have that long  
Oh, it's now or never, let's talk about, let's talk about tomorrowIt's our only world, please save us from  
ourselvesTalk about the children, what will be their legacy?  
If they have a future, it is up to you and me  
Talk about forever, for we may not have that long  
Oh, it's now or never, let's talk about, let's talk about tomorrowYeah, yeah, talk, forever, talk about
