

Bring The Light

Smashing Pumpkins

Shot down, I stood, withstood my neighborhood
I got it wrong, but I could fall alone
Lest I learn its light, to bring the lights
I fall with all my might with lights Oh, bring the light, light, bring the light
I never felt so good and right
But tonight, you'll never need another sound
Oh, bring the light, bring the light to me Hear and gone, oh, I trust, you'd spit upon my dust
And mix my ash with your blood
A son of God, you know you must arrive
In the light, bring the light, let's bring the light Light, bring the light, light, bring the light
It's yours not mine, if you just want to survive
Go grab a glimpse of any star in heaven's high
I never felt so real and loved and alive
No shadows follow me unsung
In the light, bring the light to me A flower song, clear and bright
Is it wrong in neon white?
To insist you are mine, standing dumb in the light
Bring the lights, oh, bring the lights, bring the light Light, bring the light
I never felt so real and right and alive
Don't let them steal from you what's yours by right Light, bring the light
You know there comes a place and time
You can't deny
With every movement, shadows cast and align Bring the light, bring the light
Bring the light, let's bring the light
Light, bring the light
Bring the light, let's bring the light Light, bring the light
Bring the light, let's bring the light
Light, bring the light
Bring the light, let's bring the light, light
