

They're Not Horses, They're Unicorns

Bayside

You're pulling out your teeth
And I'm the Novocaine you pump in your cheek
That's why I'm still around, you've got blood running down your chin
But you suffered peacefully She was a termite
Eating away at my roots
I was just a lost soul who needed a home
I was filling a void with you And I can't, can't wait
Till you've see see seen
What death and disgust
Have done to me And I spent three years
Wishing for two things
That one day you'd break
And I'd get to see How all the choices you've made
Would drive you insane
I wish we never met As angry as I sound
That's just the way I cover up, the way I feel
I've been that way for years and years
Slave to broken hearts and sex appeal And she was a termite
Eating away at my roots
I was just a lost soul who needed a home
I was filling a void with you And I can't, can't wait
Till you've see see seen
What death and disgust
Have done to me And I spent three years
Wishing for two things
That one day you'd break
And I'd get to see How all the choices you've made
Would drive you insane
I wish we never met She was a termite
Eating away at my roots
I was just a lost soul who needed a home
I was filling a void with you And I can't, can't wait
Till you've see see seen
What death and disgust
Have done to me And I spent three years
Wishing for two things
That one day you'd break
And I'd get to see How all the choices you've made
Would drive you insane

I wish we never met
