Dust

Refused

As the smoke settles in the Middle East
U.S.A. with no intention to make peace
Keeping America's public in dark
Just feeding them with reasons
To light the spark of hateThe tradition goes way back
To the first capitalistic attack
An area that for the last 200 years
Has shown a great example of our system to fearUnprovoked Iraqi actions
Where just a threat to OPEC's intentions
Economical wars in the sign of democracy
Just shows political agendas of hypocrisyBush administration, oil conventions
Time again for the bell of information
'Cause the media didn't have the right to cover
The civilians killed and our own losses
