## I Feel Possessed

## **Crowded House**

She said I could never do that
But I know you can, you are in my dream
We are one person not two of a kind

What was mine is now in your possessionI could feel you underneath my skin

As the wind rushed in sent the kitchen table crashing

She said nobody move

Or I'll bring the house downI hardly know

Which way is up or which way down

People are strange God only knows

I feel possessed when you come aroundIt was one of those times

Wished I had a camera on me

Six foot, now off the ground

I know how that soundsLook above you and beyond me too

That kind of view don't need an explanation

I'm not lying, not asking for anything

I just want to be there when it happens againI hardly know

Which way is up or which way down

People are strange God only knows

I feel possessed when you come aroundWhenever you invade my home

Everything I know flies out the window

It's above you and beyond me too, I don't want an explanation

But I'll be there when you bring the house downI hardly know

Which way is up or which way down

People are strange God only knows

I feel possessed when you come around

People are strange

And I feel possessed when you come around feel possessed

I feel possessed

I feel possessed
