

# That's How You Know It's Love

[Deana Carter](#)

If you get out in the drivin' rain  
Stand in the eye of the hurricane  
And never think twiceIf you turn your back on selfishness  
Cause your thoughts are for someone else  
Cause they've changed your life  
That's how you know it's love  
That's how you know it's meant to be  
When the span of forever  
Just never seems long enough  
That's how you know it's love  
When you heart insists that you give it all  
When you no longer fear the fall  
And you just let go  
When the past is finally dead and gone  
Fate leads you somewhere to the one  
That has your soul  
That's how you know it's love  
That's how you know it's meant to be  
When the span of forever  
Just never seems long enough  
That's how you know it's love  
No part of you questions  
No part of you doubts  
You're only sure this is what love's about  
And nothing and no one can stand in your way  
Or keep you from saying  
What your heart is dying to say  
That's how you know it's love  
That's how you know it's meant to be  
When the span of forever  
Just never seems long enough  
That's how you know it's love
