

# That's All Over

## Johnny Cash

When you left I shed a million teardrops over you  
But that's all over, my crying days are through  
When you left my heart was cold and every day was blue  
But that's all over, I've found somebody new Someone that can make me happy, make me wanna smile  
Someone I'm gonna have around me for a long, long while  
Someday we may meet again but I won't fall for you  
That's all over, I've found somebody new Someone that can make me happy, make me wanna smile  
Someone I'm gonna have around me for a long, long while  
Someday we may meet again but I won't fall for you  
That's all over, I've found somebody new  
Yes, that's all over, I've found somebody new
