

# Tequila After Midnight

Nanci Griffith

Tequila after midnight drives loneliness away  
Makes strangers all around you look familiar  
And tequila after midnight makes you feel so warm  
Makes you think you feel good when you don't  
It's the same sad familiar story  
Not a thing about it is new  
Just about someone who loved and lost  
And it's still hurting through and through  
They say it drives you crazy, well I could hardly care  
For quite some time now that's just where I've been  
And they say tequila kills you if you drink too much  
Lord, I hope they make tequila long enough  
It's the same sad familiar story  
Not a damn thing about it is new  
Just about someone who loved and lost  
And it's still hurting through and through
