The World Is Over

[Red Wanting Blue](#)

Camping out for the big day when the lights go out
We've just figured it out
We're all screwed now
But we're delighted about what they're writing
We may just be able to go with a bangSo beat that drum
'Til we run out all of the air in our lungs
And kiss goodbye the lovers that we've loved
We can't take 'em with us
The world is over
So beat that drumCheck it out
Mother Earth gave birth to her end
Counting you down
Make good use of what breath you've got left
So what we've just learned
We've passed the point of no return
The fuse is lit and guess what
We're gonna get burnedSo beat that drum
'Til we run out all of the air in our lungs
And kiss goodbye the lovers that we've loved
We can't take 'em with us
The world is over
So beat that drum
'Til we run out all of the air in our lungs
And kiss goodbye the lovers that we've loved
We can't take 'em with us
The world is overWait
WaitNow we wanna know
Just how we're gonna go
Hurricanes and tidal waves
UFOs and WMDs
The greatest show on earth is well on the waySo beat that drum
'Til we run out all of the air in our lungs
And kiss goodbye the lovers that we've loved
We can't take 'em with us
The world is over
So beat that drum
'Til we run out all of the air in our lungs
And kiss goodbye the lovers that we've loved
We can't take 'em with us

The world is overDelighted the world is over
