

# Night Witch

## Wolf People

Id fly every night if I could  
On wings of paper and wood  
Delivering death where ever I go  
As graceful and quite as snow  
As snow so heavy ceaselessly falls  
I will bury you allI am Night WitchHere's one for the brother I loved  
And one for the war I'm part of  
Another to turn this cold blackness to light  
So I may continue to fight  
With love and fury as my only spell  
You're already in hellI am Night Witch
