

Paper Cup

Heather Nova

Wishful thinking I might be yours
Drifting on every step
I'm always drawn to the dark horse
Sweet sweet, oh nothing's said And every dream is just a dream, after all And everything stands so still when you
dance
Everything spins so fast
And the night's in a paper cup
When you want it to last Wishful thinking you might be mine
Every shiver sends
One breath under the bridge of sighs
Bending where the river bends And every dream is just a dream, after all And everything stands so still when you
dance
Everything spins so fast
And the nights in a paper cup
When you want it to last And every dream is just a dream, after all And everything stands so still when you dance
Everything spins so fast
And the night's in a paper cup
When you want it to last And everything stands so still when you dance
Everything spins so fast
And the night's in a paper cup
When you want it to last
