If I Could

Cine

Forget the things I've said
I will never change
This is just some crazy way of trying to get you back
I'm sorry if I failed
Let me try to fix
It won't be the first time that we reach the endEverything I said, everything I thought
Things they didn't say when I had to do so
If everything can be, baby let it be
Just say it, don't hide it no
Everything I said, everything I thought
And tried to speak but instead just choke
I'll keep this to myself
Saying nothing elseIf I could, I would change it all
If I could, I would give you the world
If I could, I would change it all
Come back in time, to change your mind
We will be alright
One day before we fell apartTake this sweatshirt put it on
Girl it looks well on you, you know...
And if I try to walk out through that door
If you just say no
You know I'll stay here with yaEverything I said, everything I thought
Things they didn't say when I had to do so
If everything can be, baby let it be
Just say it, don't hide it no
Everything I said, everything I thought
And tried to speak but instead just choke
I'll keep this to myself
Saying nothing elseIf I could, I would change it all
If I could, I would give you the world
If I could, I would change it all
Come back in time, to change your mind
We will be alright
One day before we fell apartWhen forgiveness is not
Coming from the heart
Should we keep going like that?
Without you
I'm gonna live my life and...
Find a way to love againWhen I close my eyes I feel

Light breeze under golden sun
When the moon is gone
Things are rebuilt under the same tone
Please stay here with me
Don't you ever leave
Girl you are my peace
Yeah, yeahEverything I said, everything I thought
Things they didn't say cause I didn't think of nothing
I didn't think of nothing no
Everything I said, everything I thought
Things they didn't say cause I didn't think of nothing
I didn't think of nothing, yeah, yeahIf I could, I would change it all
If I could, I would give you the world
If I could, I would change it all
Come back in time, to change your mind
We will be alright
One day before we fell apart
