

Written in the Stars

Westlife

Stay with me
Don't fall asleep too soon
The angels can wait, for a moment
Come real close
Forget the world outside
Tonight we're alone
It's finally you and I It wasn't meant to feel like this
Not without you 'Cause when I look at my life
How the pieces fall into place
It just wouldn't rhyme
Without you
When I see how my path
Seemed to end up before your face
The state of my heart
The place where we are
Was written in the stars Don't be afraid
I'll be right by your side
Through the laughter and pain
Together we're about to fly I wasn't meant to love like this
Not without you 'Cause when I look at my life
How the pieces fall into place
It just wouldn't rhyme
Without you
When I see how my path
Seemed to end up before your face
The state of my heart
The place where we are
Was written in the stars We made a few mistakes, yeah
Like sometimes we do
Been through lot of hard days
But I made it back to you 'Cause when I look at my life
How the pieces fall into place
It just wouldn't rhyme
Without you
And when I see how my path
Seemed to end up before your face
The state of my heart
The place where we are
Was written in the stars 'Cause when I look at my life

How the pieces fall into place
It just wouldn't rhyme
Without you
And when I see how my path
Seem to end up before your face
The state of my heart
The place where we are
Was written in the stars
The state of my heart
The place where we are
Was written in the stars
