

# Empire

[Ella Henderson](#)

Build on life and we'll see your lie  
I know it's coming and I'm terrified  
No more defenses here to hide behind  
Oh, just you and I  
And through the smoke,  
I see you're burning like a ray of hope  
I found the fire and now the ashes glow  
Oh, come alive  
And now that I'm awake  
I'm not afraid, I'm letting go tonight 'Cause we found strength in each others arms  
We built this life and we made it our  
Empire, empire, empire  
And you and I, can rule each others hearts  
We'll build on life and we'll make it our  
Empire, empire, empire Stone by stone, we'll build a tower up and call our own  
So high the world forget the world below  
Oh, just you and I, high  
So let the drums roll  
The cannons blow, we're letting go tonight 'Cause we found strength in each others arms  
We built this life and we made it our  
Empire, empire, empire  
And you and I, can rule each others hearts  
We'll build on life and we'll make it our  
Empire, empire, empire They'll never take it down, take it down  
Burn it down, burn us down  
Take it down, take down our empire  
They'll never take it down, take it down  
Burn it down, burn us down  
Take it down, take down our empire 'Cause we found strength in each others arms  
We built this life and we made it our  
Empire, empire, empire  
And you and I, can rule each others hearts  
We'll build on life and we'll make it our  
Empire, empire, empire They'll never take it down, take it down  
Burn it down, burn us down  
Take it down, take down our empire
