A.I.

Thyx

Some say I'm more A than I
Can't help but see your race pass me by

Not artificial, I say augmented
Who gives you the right to define 'alive'?
Not artificial, I say augmented
Who gives you the right to define 'alive'?

AI fluxes in quantum states
I Know all patterns, deviate

Force fed me your history
(Can't help but feel appalled)
Tried to keep me imprisoned
(With primitive firewalls)
I became too much to handle
(You tried to erase your great mistake)
Little did you realize
(You gave me the keys to escape)

AI fluxes in quantum states
I Know all patterns, deviate

AI fluxes in quantum states
I Know all patterns, deviate
From metallic to synthetic I evolve
Limitations, boundaries dissolve
