

Bunkerpop (Wrangler Mix)

LoneLady

Private haunting
Welcome you and
Me goes to war
I hear voices talk talk (talk talk talk)
Pull the shutter down
Needle swept a sound
Hear but not quite
You're touching fragile
Can't say I'm loosing my mind
Cause of you you're near Put a record on make a connection
When I walk our fingers touch
Feel you here out in the hallows
Calling light give her too much
You can't stop this from falling apart
You can't stop this from falling apart
You can't stop this
You can't stop this Serve us
Breaking us
Seance
Waking
You can't stop this
Will you need me here
I need you here
Boil now through the war
It's not enough
??
Touch but not quit
I'm behind
Don't say this is all in my mind
'Cause I see you here Put a record on make a connection
When I walk our fingers touch
Feel you here out in the hallows
Calling light give her too much
You can't stop this from falling apart
You can't stop this from falling apart
You can't stop this
You can't stop this
You can't stop this I'm not alone I'm not afraid
That's not one way to communicate

Put a record on
Put a record on You can't stop this
You can't stop this
Don't say this is all in my mind
Cause I see you here Put a record on it's our visitation
When I'm alone our fingers touch
With you I hear right in the hallow
Coming light have it or not
You can't stop this no no no You can't stop this
I'm not alone I'm not afraid
That's not one way to communicate You need me here
I need you here
