

# Dark Star

Mike Oldfield

I traveled through time to see ya  
Hoping to find you on the other side  
Looking for something inside you  
So hard to find the dark of night  
All you need is something new  
But you're too blind to follow through  
Chasin' the dark star for you  
Moving through black holes  
To break through white noise on the radio  
Satellites spinning out of control  
'Cause I'm chasin' a dark star for you  
I traveled through space to find you  
And take you away from the other side  
Hoping to find the right words  
And break the silence  
All you need is something true  
But you're too blind to follow through  
Chasin' the dark star for you  
Moving through black holes  
To break through white noise on the radio  
Satellites spinning out of control  
'Cause I'm chasin' a dark star for you  
Chasin' the dark star for you  
Moving through black holes  
To break through white noise on the radio  
Satellites spinning out of control  
'Cause I'm chasin' a dark star  
Chasin' the dark star for you  
Moving through black holes  
To break through white noise on the radio  
Satellites spinning out of control  
'Cause I'm chasin' a dark star for you
