

Swamp Magic

Shotgun Jimmie

It's a highly complicated situation
comin' from a small town conversation
Did you come and see me? I heard you came by the store
I was out on an errand, I can't say what for

Now it feels like we've been walk through a midieval mansion
and the eyes in the portraits are slowly moving
Everyone is watchin', some have come and some have gone
Do you need a prescription? Would that help you follow along?

There's a fire in the yard and dew on the ground
There's a few lawn chairs and lots of people around
There's enough people here to stay up all night
There's enough people here to start a band alright
There's enough people here to stay up all night
There's enough people here to start a band alright
There's enough people here to stay up all night
